

Vitaminwater Death: Rumors, Controversies, and The Truth

Antifreeze substance can be found in majority of beverages, ice creams, and other food products. The controversies of vitamin water death are premature and biased. Since vitamin water products are consumed by huge population and it can not be claimed that Vitaminwater killed woman because of antifreeze substances without any proof.

Though there are some rumors and controversies surrounding the recent death of a woman arise, packaged vitamin water consumption is growing day by day and US market is full with energy drinks.

In the US people prefer these bottled vitamin water supplements. Most of them simply like these supplements because of their nutrient value. Others like their flavors.

People prefer these Vitaminwater products since they are convinced that they are drinking health boosting drink unlike aerated and acidic carbonated beverages. Even youngsters are smitten by these health drinks and find them really tasty. The Glacéau range of vitamin products is very popular amongst youngsters.

Though some of the people who consume such drinks aren’t even aware of presence of antifreeze in vitamin water and its possible side effects; people who are advised by doctors to increase their water intake find these bottled Vitaminwater the best alternative.

The Vitaminwater is enriched with distilled water, fructose, natural fruit flavorings, citric acid, vegetable colorings, health vitamins & minerals such as niacin, magnesium, cyanocobalamin, vitamin C, vitamin B6, electrolytes and fruit extracts.

Even a small whiff of rumor tends to scandalize the image of a long established company and degrades its market image in seconds. Coca Cola has faced such a drastic situation as the rumor of antifreeze vitamin water speeded on internet via email.

However, these rumors failed to live long as they were baseless and were aimed to defame the company. It’s really rejuvenating and tasty drink. The rumors regarding inclusion of antifreeze in vitamin water failed and did not excite any opposition for the drink in the market.

For a moment it scared consumers but clouds of scandal swept off immediately as there were no evidence of death caused by antifreeze element in Vitaminwater. Besides the water content, it adds on to the nutrient supplement into the body. Vitamin is a water soluble nutrient and acts as an electrolyte.

The main constituents of Vitamin water are distilled water and herbal extracts which keeps body detoxified and free from the threat of dehydration. One of the best things that one can have to beat the scorching heat of the summers and to quench thirst is to have lots of water.

But water alone doesn’t seem to fulfill nutritional requirement. And that is when these innovators of energy drinks come with a perfect combination of water and vitamins-the Vitaminwater. Because of their exceptional nutritional value and capacity to instant energy boosting, these Vitaminwater brands has been quite popular and loved by almost all the age groups.

The clouds of controversies surrounding around the death of Mexico woman after drinking Vitaminwater are over. Such rumors based on the prejudice and rivalry game are not able to convince and divert people from drinking Vitaminwater.
