

## Pros and cones of SmartLipo treatment

Problem of weight gain is faced by majority of people with increasing fats in body. Accumulating fats is becoming the source of worries as it not only increases inertia in body but also results in various disorders. An individual should follow regular exercise and planned diet along with various therapies.

The increasing problem of excess fats in body is resulting in various disorders. One of the latest techniques to overcome the problem of excess of fat is SmartLipo technique.&nbsp;

### Best treatment area

It removes fat from some specific pocket areas. Some of them are thighs, waist, breast, upper arms, chin, face etc&hellip; but it cannot be practiced by people suffering from heart problem, liver problem, diabetes etc&hellip;&nbsp;

### Advantages of SmartLipo

There are numerous of advantages of SmartLipo technique. The use of local anesthesia leads to minimum complications and the person remains in its conscious during the treatment. There is no operation which avoids the tissue damage. The use of laser causes clotting of surrounding tissues that avoids bleeding. It is approved by FDA. Small incision does not produce any scar. Loosening of skin does not takes place due to collagen deposition around surrounding cells, which tighten the skin. It is not as expensive as other cosmetic techniques. No discomfort after the treatment. The person can be back to his work within 2-3 days. Disadvantages of SmartLipo

Every technique along with its advantages has some disadvantages. The disadvantages of SmartLipo techniques are:- Lesser quantity of fat is removed. This treatment is done only in some localized pocket of areas. It is not easily affordable. It cost \$2000-\$6000 in one session. Being a cosmetic procedure, it&rsquo;s not insured.&nbsp; SmartLipo treatment cost

It is this factor that takes people away from the treatment. With numerous of advantages, the cost factor hinder the pathway to the solution for obese people. It can be somewhere in the range of \$2000-\$6000. This treatment cost is not covered by any insurance company.

### Is it approved?

Yes! The SmartLipo treatment was approved by US Food and Drug administration (FDA) in November, 2006. It follows the standards of FDA department. It is an added advantage to the patients undergoing SmartLipo therapy.
